Professional Summary

Frontend Developer with hands-on experience delivering production-ready web applications using React.js and Next.js, with a strong focus on performance, scalability, and maintainable architecture. Experienced in building component-driven UIs using JavaScript (ES6+), applying Atomic Design principles, and organizing clean, scalable folder structures. Proficient in state management with Zustand, server-state handling using TanStack Query, and REST API integration with Axios. Skilled in implementing responsive and consistent UI using Tailwind CSS, Bootstrap, and modern design systems. Comfortable working with Git version control, feature-based branching workflows, and collaborative development environments. Familiar with backend integration using Node.js, MySQL, and MongoDB, with strong problem-solving, debugging, and performance optimization skills aligned with frontend best practices.

Experience

Frontend Developer

PT Halim Inti Gahara (XIONCO) — South Tangerang, Indonesia

June 2025 – Present

- Led the development of multiple production-ready web applications, including an internal enterprise system and a customer-facing e-commerce platform using React.js and Next.js App Router (v16).
- Architected scalable frontend solutions using Zustand for client-state management and modern data-handling patterns to ensure maintainable UI behavior.
- Designed reusable and responsive UI components using Tailwind CSS, Bootstrap, and shadcn/ui, improving development efficiency and UI consistency.
- Integrated RESTful APIs and third-party services, including Midtrans payment gateway, using Axios to ensure secure and reliable transactions.
- Improved performance and user experience by optimizing heavy operations with Node.js Worker Threads and enhancing UI interactions using Framer Motion.
- Took ownership of deployment and production maintenance on VPS (cPanel), collaborating across frontend and backend concerns using MySQL.

Frontend Web Developer (Intern)

GlowUp Career Consultant — Remote (Medan, Indonesia)

June 2025

- Designed and developed a modern, performance-optimized company website aligned with business objectives and branding.
- Created intuitive UI/UX designs using Figma, focusing on usability and clean visual hierarchy.
- Built modular frontend components using React.js and Tailwind CSS following reusable component patterns.
- Applied responsive design principles to ensure optimal experiences across multiple devices.
- Optimized website structure to support SEO best practices and faster load times.
- Collaborated remotely with cross-functional teams through iterative weekly development cycles.

Web Developer (Intern)

IFTA Jelajah Indonesia — Jakarta Selatan, Indonesia

April 2022 – July 2023

- Led the development and maintenance of the company's WordPress-based website, ensuring performance, stability, and usability.
- Enhanced UI design to deliver a professional, user-friendly interface aligned with organizational branding.
- Optimized website structure and content accessibility to improve information discoverability.
- Supported the organization's digital publication strategy through consistent updates and content integration.
- Applied best practices in responsiveness, performance optimization, and cross-browser compatibility.

Education

Bachelor of Informatics Engineering

Pamulang University — South Tangerang

2018 – 2023

Dicoding Academy — Bandung

2023

Certifications

- Programming Competency Certification — BNSP (Certified & Competent)
- Git Basics with GitHub — Dicoding
- Web Programming Basics — Dicoding
- JavaScript Programming Basics — Dicoding
- Structured Query Language (SQL) Basics — Dicoding
- Creating Web Applications with React — Dicoding
- Front-End Web Development for Beginners — Dicoding

Projects

- XIONCO Web Mobile (E-Commerce Platform) — Developed a mobile-first e-commerce application for custom product ordering using Next.js App Router (v16), Zustand for state management, and Tailwind CSS. Integrated Midtrans Payment Gateway, implemented interactive features such as Flash Sale and Spin-to-Win game, enhanced UI with Framer Motion, and deployed on VPS (cPanel) with MySQL database.
- HIG System (Internal Management System) — Built an internal enterprise system for order management, inventory tracking (inbound/outbound), HR attendance, QC, packing, and delivery workflows. Implemented multi-user authentication, background processing using Node.js Worker Threads, developed with JavaScript, EJS, Bootstrap, and MySQL, and deployed on VPS (cPanel).
- XIONCO Business (On-Going Project) — Currently developing a scalable business platform using Next.js App Router (v16), Tailwind CSS, Zustand, and TanStack Query, focusing on performance, maintainable architecture, and modern user experience patterns.
- Hotel Booking Website (Final Thesis Project) — Developed a hotel booking platform integrated with Midtrans Payment Gateway to support secure online transactions.

- Personal Portfolio Website — Built using Next.js, Framer Motion, and TypeScript to showcase projects, skills, and professional experience with an interactive and responsive UI.
- Note App — Developed a React.js CRUD-based note-taking application with archive functionality.
- Todo List App — Built a task management application with create, update, and status tracking features.
- Contact App — Developed a contact management application with phone number identification and tagging features.
- IFTA Jelajah Indonesia Website — Redesigned the website UI using WordPress, improving usability, navigation, and responsive behavior.
